SUMMARY

AI deployment strategist and founder with 10+ years deploying enterprise SaaS, automation, and analytics solutions for global customers — and hands-on daily experience designing, building, and iterating on AI agents with Claude and Claude Code. As founder of Dantra, shipped a production multi-tenant healthcare SaaS solo using multi-agent AI workflows for development, code review, and adversarial security review. Previously owned Mainchain, Mainfreight's customer-facing enterprise SaaS portal — leading discovery, integration deployment, and UAT for 50+ enterprise customer integrations (Verizon, Ecolab) to 80%+ adoption across 300+ global branches and \$2.3M in annual customer savings. Consultative, high-agency, commercially minded: business cases, pricing and unit economics, executive workshops, and pre-sales partnership that raised technology-attached win rate 25%.

CORE SKILLS

AI Agents & LLM Deployment: Claude & Claude Code (multi-agent workflows, agent design and iteration, automated code review), LLM-assisted development, prompt engineering, AI workflow automation, Power BI Copilot

Enterprise SaaS & Integration: EDI/API integration deployment, API specification, User Acceptance Testing (UAT), multi-tenant SaaS architecture, REST APIs and webhooks, Robotic Process Automation (Kofax RPA)

Customer Engagement & Commercial: Discovery and scoping, executive workshops and storytelling, Voice of the Customer, business cases, pricing and unit economics, commercial success metrics (adoption, NPS, revenue), pre-sales partnership

Data & Analytics: Advanced SQL, Python, Power BI (DAX, semantic models), Azure Synapse, Azure Data Factory, Snowflake, dbt, dimensional modeling, TypeScript/Next.js, PostgreSQL, Cloudflare Workers

EXPERIENCE

Founder · Dantra (dantra.in) · Remote

2026 – Present

- Founded a white-label, multi-tenant dental practice-management SaaS for Indian clinics; conducted customer discovery on paper-based clinic workflows and translated findings into positioning, three-tier pricing with unit-cost economics, and a productization roadmap.
- Designed, built, and shipped the production platform solo using AI-agent workflows (Claude Code) across the full lifecycle — architecture, development, automated code review, and adversarial multi-persona review boards for security, UX, and go-to-market — going from concept to deployed product as a single founder.
- Built and iterated on multi-agent AI review processes that validated the product before customer exposure: an adversarial AI red-team review — agents with no authorship of the code — returned zero critical findings across tenant-isolation, payment-integrity, and access-control attack paths.
- Engineered the platform on TypeScript/Next.js, Cloudflare Workers, and PostgreSQL with row-level-security tenant isolation, GST-compliant immutable billing, field-level RBAC, and audit logging — CI/CD gated by an automated cross-tenant isolation test matrix.
- Defined commercial success metrics and go-to-market strategy end-to-end: WhatsApp Business Platform integration and message-economics model, investor deck, and a state startup-grant application.

Senior Product & Analytics Lead · Mainfreight Inc. · Carson, CA

Mar 2021 – Dec 2023

- Owned end-to-end customer engagements for Mainchain, a customer-facing enterprise SaaS portal (real-time shipment visibility, milestones, customs, invoicing) — from discovery and strategic scoping through deployment and adoption, reaching 80%+ adoption across 300+ global branches.
- Deployed automated EDI/API integrations for bookings, milestones, customs, and invoicing — achieving 98% straight-through processing, eliminating 1,000+ manual transactions annually, and delivering \$2.3M in annual cost savings for enterprise clients including Verizon and Ecolab.
- Designed and owned API specifications and use cases for customer-facing integrations, directing User Acceptance Testing for 50+ enterprise integrations with 100% on-time go-live delivery.
- Translated Voice of the Customer insights into prioritized requirements and roadmap decisions, presenting trade-off recommendations to leadership and building consensus across engineering, product marketing, sales, and

operations.

- Developed and presented business cases for new capabilities, monitoring commercial success metrics including adoption rate, NPS, profitability, and customer satisfaction across global regions.
- Partnered with Account Executives, product, and engineering during pre-sales cycles on high-visibility initiatives, increasing technology-attached win rate by 25%; led a team of 4, improving productivity 25%.

Business Intelligence Engineer · Modern Gourmet Foods · Irvine, CA

Apr 2019 – Mar 2021

- Led BI platform restructuring, transitioning 85% of reports from manual Excel to automated Power BI / SQL-backed dashboards — reducing manual effort by 40%.
- Implemented Kofax Robotic Process Automation for financial data entry — 98% reduction in process time, 16% increase in accuracy, ~200 hours/month saved.

Business Intelligence Analyst · Tata Consultancy Services (Client: Citi) · Chennai, India

Nov 2012 – Dec 2016

- Built interactive dashboards used by 100+ global stakeholders across 5 regions to analyze payment trends, transaction volumes, and product performance.
- Partnered cross-functionally across 5 regions to define product requirements and functional specifications for a global payments platform, directing Scrum ceremonies and reducing feature delivery time by 25%.

PROFESSIONAL DEVELOPMENT

Independent upskilling · self-directed portfolio work

2024 – 2025

- Built proficiency in modern data stack technologies (Snowflake, dbt, Apache Superset) and applied LLM-based tooling (Claude, Claude Code) to automate reporting workflows, prepare datasets for AI ingestion, and accelerate dashboard prototyping.
- Prototyped a Power BI Copilot natural-language-query proof-of-concept on logistics datasets, demonstrating AI-driven analytics use cases on a Microsoft Fabric semantic model.
- Built a Microsoft Fabric end-to-end analytics pipeline (Lakehouse, Dataflows Gen2, OneLake) on a retail dataset (~20K orders, ~\$29M revenue), delivering a Power BI dashboard with optimized star schema (public on GitHub).

EDUCATION & CERTIFICATIONS

Master of Science, Information Systems · California State University, Fullerton · 2019 · GPA 3.7

Microsoft Power BI Data Analyst (PL-300) · Tableau Desktop Certified · CargoWise Certified Operator & Specialist · Kofax RPA 10 · Google Data Analytics Professional Certificate · AWS Cloud Practitioner Essentials
